

**Ancestry Atlas** is a powerful tool that enables you to capture and visualise that diversity, and turn it into a powerful teaching and communication tool. Ancestry Atlas is a conversation starter which makes learning more about each other simple and fun.

Students complete a short survey, about birthplace and languages that they speak, allowing Ancestry Atlas to measure the beautiful diversity of the school. A picture tells a thousand words and a map of your whole school ancestry tells the story of your community.

## PERSONAL DETAILS

# LANGUAGE PROFICIENCY

languages the student speak

**FIRST NAME:**

[illegible]

The final result (global graphics) will be shared with the student by their teacher, once all data has been collected.

This is a sample of how our cultural diversity will look like.
